

Subscription & Journal Management Platform for University Presses and Journal Publishers

Multipub is a subscription management platform that handles items unique to university presses and journal publishers. Manage open access, site licenses, entitlements, eBooks, printed books, journals, conferences, multiple currencies and packaged or bundled products in one system.

Along with accounting, marketing and fulfillment, Multipub:

- ✓ Handles subscriptions, alongside one-off products.
- ✓ Calculates royalties, currencies and taxes to increase accuracy.
- ✓ Manages site licenses, consortia and group accounts, saving you time.
- ✓ Integrates with shopping carts, paywalls and CMS systems.
- ✓ Simplifies events and inventoried products.
- ✓ Offers marketing data and reporting analysis.
- ✓ Integrates easily with a variety of third party vendors.
- ✓ Provides valuable engagement data.

"By making the switch to Multipub, we can now manage both products and subscriptions in one system. Having the data in a single place makes work more efficient and allows us to access a comprehensive view of our entire audience."

Pamela J. Wilson
Journals Manager
University of Hawaii Press
